COMMENTS

Signals too late

Traffic Check

Traffic check is a scored item for just about every maneuver on the DPE. Traffic check is the constant scanning for vehicle traffic, pedestrian traffic, and road hazards and the safe reaction to these items.

Parking Lot Driving

Check for vehicle and pedestrian traffic while driving through the parking lot at a safe speed.

Backing

Pull to the curb, back vehicle three vehicle lengths, and then pull back into traffic safely.

Right and Left Turns

Begin and end a turn in the safest lane available. Make your turns smoothly and without swinging too wide or cutting too short.

Intersections

Check for traffic as you approach an intersection. Stop behind the limit line or with adequate space between you and the vehicle ahead. Proceed through intersection when safe.

Lane Change

Signal, look over appropriate shoulder, move into the next lane when there is an adequate gap, and cancel signal.
